

SHEHARYAR KHAN

FULL STACK ENGINEER | REACT & REACT NATIVE

Lahore, Pakistan | +92 312 7816690 | sheharyark017@gmail.com | [linkedin.com/in/sheharyar-khan-a8b3b3222](https://www.linkedin.com/in/sheharyar-khan-a8b3b3222)

PROFESSIONAL SUMMARY

Full Stack Engineer with 5+ years of experience delivering React, Next.js, React Native, and Expo applications. Builds reusable web and cross-platform mobile experiences, integrates REST APIs, and contributes across Node.js backend services, authentication, databases, testing, and delivery. Experienced with AWS Cognito using the AWS SDK, Next.js Server Actions, server-rendered components, and production-minded code review workflows.

TECHNICAL SKILLS

Web: React.js, Next.js App Router, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, shadcn/ui, Radix UI, Ant Design, Framer Motion, SSR, ISR

Mobile: React Native, Expo SDK, Expo Router, React Navigation, NativeWind, React Native Reanimated, iOS and Android, mobile lifecycle and performance

State, APIs and Backend: Redux Toolkit, RTK Query, GraphQL, Apollo Client, REST APIs, Node.js, Express.js, Next.js API routes, PostgreSQL, MongoDB, Supabase, Prisma, Redis

Authentication and Delivery: AWS Cognito and AWS SDK, JWT, MFA, role-based access control, Git, GitHub, CI/CD, GitHub Actions, Vercel, AWS Amplify, code reviews

Quality and Workflow: Responsive and accessible UI, performance optimization, SEO, Cypress, AI-assisted development with coding agents, Agile collaboration

PROFESSIONAL EXPERIENCE

Folium AI | Senior Software Engineer | July 2025 - Present

- Lead frontend development with React.js, Next.js, TypeScript, and React Native, building modular interfaces and reusable application architecture focused on performance and maintainability.
- Integrate complex authentication flows and secure data-handling patterns for web and mobile product features.
- Mentor developers, conduct code reviews, and contribute to technical planning, frontend standards, and team-level engineering decisions.

Cyber Evangelists | Senior Software Engineer | June 2024 - July 2025

- Developed high-traffic React applications with SEO, responsive behavior, cross-browser compatibility, and reusable component patterns.
- Implemented RTK Query for asynchronous REST API consumption, caching, and state handling, reducing redundant network requests by 40%.

Bitsclan IT Solutions | Software Engineer | November 2022 - May 2024

- Built and maintained full-stack features using React and Node.js, connecting relational database workflows and REST APIs with responsive user interfaces.
- Contributed to mobile-first initiatives designed to improve user engagement across platforms.

Inkhorn Solutions | Front-End Developer | February 2021 - October 2022

- Built pixel-accurate, responsive components and integrated RESTful services across client applications.

SELECTED PROJECTS

Billwell - Medical Bill Analysis and Dispute Platform | Web & Mobile

- Built web and cross-platform mobile features for a medical-bill analysis and dispute product, including onboarding, case management, document workflows, and chat experiences.
- Developed the iOS and Android client with React Native and Expo, using Expo Router, Redux Toolkit, NativeWind, secure storage, camera/image workflows, and PDF experiences.
- Implemented AWS Cognito authentication with the AWS SDK across Next.js Server Actions, API routes, and mobile flows: signup, email verification, login, password recovery, MFA, token refresh, protected sessions, rate limiting, and audit logging.
- **Technology:** Next.js 16, React 19, React Native, Expo SDK, TypeScript, Tailwind CSS, Redux Toolkit, RTK Query, AWS Cognito, Upstash Redis, React Hook Form, Zod, Cypress.

Human Resource Portal

- Engineered a scalable, multi-tenant HR platform in a Turborepo with shift scheduling, employee lifecycle management, punch and leave approval workflows, and interactive organizational charts.
- **Technology:** Next.js 16 App Router, React 19, TypeScript, Turborepo, Redux Toolkit, Tailwind CSS v4, Radix UI, shadcn/ui, TanStack Table, React Flow, Recharts.

U.S. County School and Youth Support Platforms | Money Talks, SeedFunds & Foster Ferret

- Contributed to three role-based education and youth-support applications for U.S. county programs, serving students, teachers, organizations, administrators, youth, caregivers, and vendors.
- Built reusable React and Next.js interfaces for learning, lesson reflections, dashboards, onboarding, engagement, transactions, enrollments, and caregiver workflows across a Turborepo architecture.
- Built cross-platform React Native and Expo mobile experiences for SeedFunds and Foster Ferret, covering school, graduation, authenticated user journeys, navigation, API integration, state management, and mobile performance.
- **Technology:** React, Next.js, React Native, Expo, Expo Router, TypeScript, Turborepo, Redux Toolkit/RTK Query, REST APIs, React Navigation, Reanimated.

Attack Insights - Security Web Application

- Developed a Next.js security platform for domain and IP vulnerability scanning, giving users a focused workflow to initiate scans and review actionable findings.
- Implemented DNS TXT-record ownership verification, API-driven scan management, result handling, and responsive dashboards for security data.
- Improved application reliability with SSR, cached data access, and reusable UI patterns for complex security information.
- **Technology:** Next.js SSR, React, TypeScript, RTK Query, Redis, REST APIs, Tailwind CSS, Ant Design.

EDUCATION AND PROFESSIONAL DEVELOPMENT

- BS in Computer Science, ongoing - Virtual University of Pakistan
- Full Stack Development and Soft Skills Fellowship - Jadu, five-month program
- React.js - Maximilian Schwarzmuller, Udemy | JavaScript - Jonas Schmedtmann, Udemy
- SQL and Database Design - Colt Steele, Udemy | Front-End Web Development - Dr. Angela Yu, Udemy
